PROJECTS

Nourishfy – AI Nutrition & Smart Groceries <i>React.js, Tailwind CSS, Firebase, Gemini API</i>	Sept. 2025
- Built an AI-powered nutrition planner that generates personalized weekly food plans based on user deficiencies, symptoms, and dietary exclusions using Gemini 2.5-flash. - Implemented Firebase Authentication and Firestore to manage user profiles, nutrition plans, grocery tracking, and archived history with real-time updates. - Designed a mobile-first UI with dark/light mode and integrated dynamic grocery list generation with food image caching for optimized API performance.	
IntelliQRHelp <i>React.js, Firebase, QRServer API, Telegram Bot API</i>	Jan. 2025
- Developed an emergency response system generating 1,000+ encrypted QR codes linking to user medical profiles. - Built a web dashboard for 300+ users to securely update medical details and manage 5+ emergency contacts each. - Utilized Firebase Authentication & Firestore for secure data storage, ensuring real-time updates and seamless access.	
RiskAdvisor – AI-Powered Risk Assessment Tool <i>React.js, Google Agent Development Kit (ADK)</i>	Oct. 2025
- Developed an AI-driven risk advisory framework utilizing the Google Agent Development Kit (ADK) to evaluate dynamic inputs and identify potential vulnerabilities. - Orchestrated multi-agent workflows to analyze complex risk vectors, generating automated, actionable mitigation strategies for users. - Designed an interactive dashboard to visualize real-time risk metrics and archived assessments, ensuring seamless continuous monitoring.
